The **China Public Administration Review (C-PAR)** was launched in December 2019, preceded by a continuous publication series under the same name from 2004. The journal is based at the School of Public Policy and Management, Tsinghua University, and published by Tsinghua University Press. C-PAR has established an academic committee and editorial board composed of renowned scholars in the field. The editor-in-chief manages the daily operations of the journal, assisted by the editorial office. Currently, it is issued quarterly. C-PAR is an indexed journal in the CSSCI (Chinese Social Sciences Citation Index), AMI Core New Journal, and a Key Magazines of China Technology.

C-PAR is committed to academic integrity and adheres to rigorous standards for paper publication. It invites lead editors from outside Tsinghua University to manage the review process following the rules of double-blinded peer review. It aims to connect public administration practice in China's context with rigorous theories in the discipline of public administration. It encourages more evidence-based research derived from and directed toward practice. The journal has continuously refined its submission and review processes with the support of reviewers and authors, advocating for more open dialogue among them. It has actively participated in academic community-building alongside other journals and academics. Regular columns include original research articles, practical perspectives, seasonal reviews of outstanding English and Chinese articles, and others.

Since 2021, C-PAR has been organizing the "One Hour for Young Talents" workshop series, aiming to provide early-career scholars with opportunities for deep academic exchange. Each workshop session accepts between 5 to 8 papers, with each paper discussed for one hour. The "One Hour" discussion proceeds as follows: an invited expert discussant will introduce the paper from a reader's perspective and provide an in-depth review for 20~25 minutes, followed by the author responding to the discussant's comments for 10~15 minutes, and then 10~15 minutes of in-depth on-site discussion.
